DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cowles et al., 5,959,929.

Cowles et al., 5,959,929, discloses in Fig. 1A a synchronous DRAM comprising:
four memory array banks 22, 24, 26, 28 which may more than four banks (see lines 55-57, column 8);
refresh two address counter 56;
row address multiplexer 36;
bank control select logic circuit 44;
control logic circuit 32;
auto refresh command (see lines 42-57, column 5);
wherein: bank control select logic circuit 44 obviously can cause at least two but less than all of the four or more memory banks or at any desired number of memory banks to be refreshed. It is merely a matter of programming as well known in the memory art.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
